

## FUTURE UNCERTAIN

Rise in commodity prices to continue; rose **89%** since 2002: crude oil up **158%**, zinc and copper by more than **322%**.

World GDP to expand at **3.4%** in 2007; China at **10.5%** and India at **8.5%** to lead expansion.

Speculative capital flows distorting exchange rates and worsening current account imbalances.
